- Full non-slip wet area flooring
- Ramp supplied

Thanks to the portable nature and thoughtful design of the **PIP HygeiaPod**, our installation team can deliver this innovative temporary bathroom solution directly to a customer's home, quickly and efficiently, anywhere across Victoria. While delivery and installation are fast, the HygeiaPod ensures you don't have to compromise on comfort, convenience, or safety.

We understand the importance of supporting unrestricted mobility when using bathroom facilities, and we've designed the HygeiaPod with accessible features and compliance in mind to make everyday life easier.

Whether you're continuing to live at home during renovations or returning from hospital or care, the HygeiaPod allows you to enjoy full access to safe and private bathroom facilities at home.

All HygeiaPods come fitted with the necessary adaptations to make toileting and showering easier for people with physical challenges. The unit is safe, hygienic, easy to clean, and fully compliant with Australian plumbing and electrical standards. It includes a self-contained, thermostat-controlled hot water system.

HygeiaPod does not feature a pop-up roof like the AccessPod, which means it may not be suitable for installation in garages with low roller doors. However, if the head height of the garage exceeds the fixed unit height of 2360 mm, indoor installation is still possible. Ideally, the HygeiaPod is best suited to outdoor use or under cover in areas with sufficient clearance.

Quick Installation:

The HygeiaPod can be installed in just a few hours. Custom ramped access can also be designed and delivered as needed to ensure ease of entry.

What Are the Advantages?

- Available across all areas of Victoria
- Fully compliant with plumbing and electrical regulations
- Can be installed in garages (if clearance allows), carports, or outdoor areas
- Flushable conventional toilet
- Available for short- or long-term hire
- Designed with accessibility in mind

When to Use the HygeiaPod?

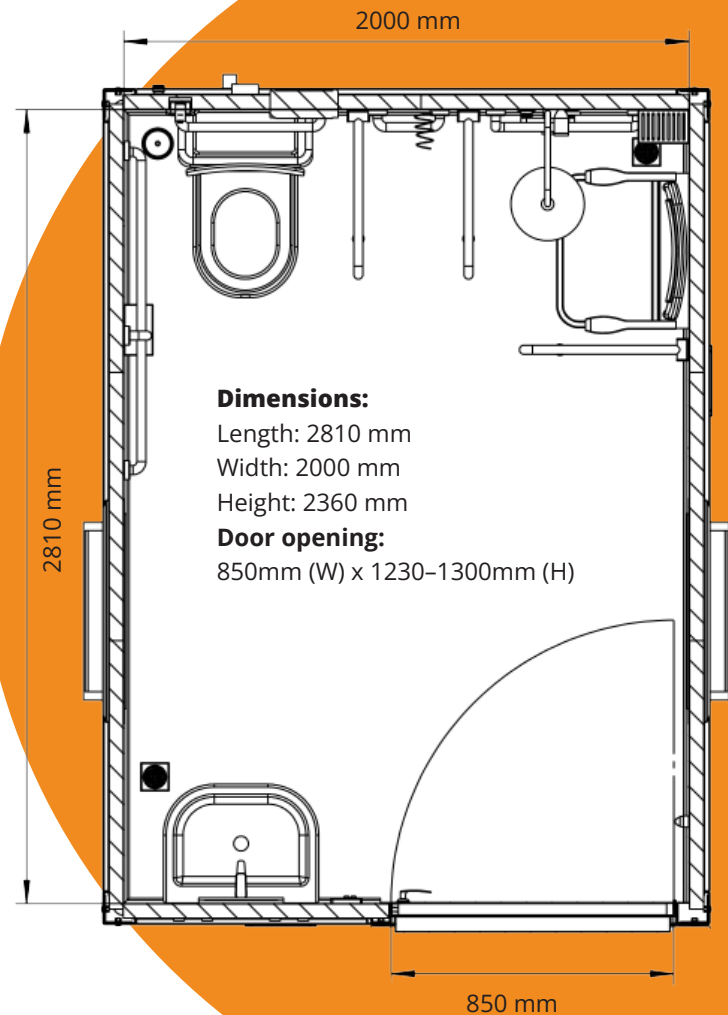

- When temporarily relocating or considering respite care during bathroom renovations
- To prevent unnecessarily long hospital stays while waiting for funding or home modifications
- As part of palliative care support at home
- For people living in rental properties who cannot alter existing bathrooms
- For individuals with mobility challenges needing safer bathroom access

Technical Specifications & Requirements:

- Allow as much clear space as possible for user access
- Allow 300 mm clearance at the rear for plumbing services
- 10 amp, 240-volt power point
- Access to a garden tap
- Access to a sewer gully trap

Who Benefits from the PIP HygeiaPod?

- Anyone recently discharged from hospital but unable to safely access their existing bathroom
- People with disabilities or mobility issues
- Tenants in rental properties who are unable to make permanent modifications
- Individuals receiving palliative care or home rehabilitation
